metrici
accurate recognition

SPECIALLY DESIGNED INTERFACE FOR TOUCHSCREEN - MOBILE LPR DETECTION

Usefull for law enforcement, companies or public administration which want to manage parking lots to detect parking violations, based on license plates reading

DEDICATED SOLUTIONS

Metrici Parking Enforcement can ease the work of public administrations or parking managers. A camera mounted on top of a car will do a LPR reading on the move and can generate alerts for different scenarios. You can also secure private parking spots or reserved. This is meant to reduce number of illegal parkings and to improve traffic flow. Usefull also for abusive use of parking spots, both for time intervals as well as right for a certain location.

GPS

- Every LPR detection can be associated with GPS coordinates - usefull in mobile applications to detect illegal parking

EXTERNAL CONNECTION

- Integration and communication with third parties: software, hardware or database. You can check live a valid parking permit or blacklists

ALARMS

- Alerts for license plates on blacklists.
- Alerts for illegal or invalid parking.
- Alerts for overtime parking

FUNCTIONS

- Colour coded lists for LPR detection depending on their rights: valid parking, overtime, ilegal parking, wanted vehicle

FRIENDLY INTERFACE
FOR EASY USE

With one or more vehicle mounted cameras, Metrici detects license plates, interrogates a database and displays relevant info about readings. The data are shown on a touchscreen and can be sent to external systems. You can also wasily integrate with payment solutions or mobile apps.

Payments

Automatic ticket issues and integration with cash registers

Statistics

Time limit setting for parking. Alerts for overdue

Wanted vehicles list

Interogare baze de date pentru masini cautate sau care nu au drept de parcare

Implementation

Meant to deter illegal parking, on long term or on restricted areas

Operations

Metrici checks the parking rights, parking time and place. Better traffic flow and driver experience for the others

Tailored

The Interface, communication and settings can be adapted to different working scenarios depending on location specifications
