

**DOPPLER
RADAR
MADE BY METRICI**

**Special design for industrial or city traffic use
Moving/Stationary Doppler radar system**

WHERE TO USE

Metricí Observer Radar can be used in parking lots, industrial parks or around specific interest points for local administration, law enforcement agencies or private companies in different scenarios, for speed up to 160 km/h:

- schools
- busy streets
- crosswalks
- events
- industrial park & shopping centers

- Greater targeting range- 100 m
- Improved performance in poor weather
- Bidirectional
- Default integration with Metricí LPR and Metricí LED Display
- Plate number saved in database with speed and GPS location

INTEGRATION

GPS

ALARMS

ON SITE

- Speed of the vehicle can be shown on a **Metricí LED Display** along the plate number

- GPS location for any detection alongside speed of the vehicle and plate number

- Alerts settings when certain speed limits are reached with e-mail, pop-up or SMS

- Traffic calming device designed to slow speeders down by alerting them of their speed.
